PROFILE SUMMARY

Creative and detail-oriented Frontend Developer with a passion for building visually stunning, responsive, and user-friendly websites. Skilled in modern technologies like React.js, Tailwind CSS, and JavaScript, I specialize in crafting performance-optimized UIs with clean, maintainable code. Adept at collaborating with teams, integrating APIs, and delivering seamless user experiences. Always learning, always coding — driven to bring ideas to life through code and design.

PROJECTS

ACHIEVERS IT

2025 - PRESENT

- Built a modern, responsive eCommerce website from scratch using React JS and Redux Toolkit. Integrated product categories, dynamic product pages, and a functional shopping cart with add/remove item features. Utilized Tailwind CSS for a glowing UI and implemented async data fetching with createAsyncThunk.

ACHIEVERS IT

2025

- Created a responsive weather application that fetches real-time weather data using the OpenWeatherMap API. Users can search for any city and get current temperature, weather conditions, humidity, and more.
- Highlights:
- Integrated REST API using Fetch in JavaScript
- Displayed dynamic icons and background changes based on weather condition
- Mobile-first responsive layout

ACHIEVERS IT

2025

- Built a collection of mini projects to strengthen JavaScript fundamentals and DOM manipulation skills. Each project focuses on solving a specific UI or logic challenge.
- Projects Included:
- Keyboard Ninja: A typing game where letters fall from the top, and the user must hit the correct key to score points.
- Digital Doppelgänger: A fun UI where users generate a cartoon clone by selecting favorite colors, foods, etc..
