PROFILE

Detail-oriented Python Software Developer with a strong foundation in full-stack web architecture. Experienced in building robust backends using Python and Django, designing scalable MySQL databases, and seamlessly integrating RESTful APIs. Adept at bridging complex server-side logic with modern, responsive frontend frameworks like React.js and Tailwind CSS to deliver high-performance, user-centric web applications. Driven by a commitment to clean, maintainable code and continuous technical growth.

WORK EXPERIENCES

PYTHON DEVELOPER

Dev. Al imtedad (2025 - Present)

- Developing dynamic web application for iptv based hotel management system using Django, implementing backend functionalities, RESTful-API's, database management and secure user authentication
- Python, Django, Mysql, REST-api, git, GitHub, Pytest

PROJECTS

UNIVERZO MUSIC

- Designed and deployed an ad-free React.js music streaming platform optimized for high-performance audio and a seamless, login-free user experience.
www.univerzo.in

SAYONARA

- Developed Sayonara, a full-stack Omegle-style video chat application with a React frontend and FastAPI backend, implementing WebRTC-based peer-to-peer video calls, WebSocket signaling, guest authentication, and real-time random user matchmaking.

SKILLS

Python

Django

HTML

CSS

React Js

Javascript

Tailwind Css

My SQL

Rest Api

GitHUB

EDUCATIONS

MECHANICAL ENGINEERING

Hindusthan college of engineering & technology

2020-2024

PYTHON FULL STACK

Achievers It

2025/JAN - 2025/JULY
